

/home/user/repo/image.h

```
graph TD; A["/home/user/repo/image.h"] --> B["string"]; A --> C["iostream"];
```

The diagram illustrates a file dependency. A box at the top contains the file path `/home/user/repo/image.h`. Two blue arrows originate from the bottom center of this box and point downwards to two separate boxes. The left box contains the text `string` and the right box contains the text `iostream`. This indicates that the `image.h` file depends on or includes the `string` and `iostream` headers.
